SUMMARY

Frontend engineer with 5+ years of experience building complex product UIs in Vue, React and TypeScript. I ship features end to end, from shared components and GraphQL to tests, and I've led projects in teams of 4 to 9. At TheyDo I build the permissions, filtering and AI features that enterprise customers rely on. Comfortable beyond the frontend with Node.js, AWS and Terraform.

EXPERIENCE

Frontend Engineer — TheyDo

Remote (Amsterdam, NL) · Jan 2025 – Present

Journey management platform for enterprise customer experience teams. 9-person product team in a 40+ engineer organization.

- Led the new filtering system: a chip-based filter bar that lets users narrow down large workspaces quickly.
- Led Custom Views, which let users save filters and workspace configurations as reusable views.
- Built most of the frontend for Teams, an entity-level permissions system that unblocked enterprise deals.
- Integrate AI into new product features, connecting models through our GraphQL layer to the UI.
- Build shared design system components, migrate existing screens to them and document them in Storybook.
- Review pull requests, help shape engineering decisions and write unit and end-to-end tests.

Stack: Vue, TypeScript, Apollo GraphQL, Vitest, Playwright

Software Engineer — Comsysto Reply

Munich, Germany · Jul 2023 – Dec 2024

- Led the frontend for a web platform that controls Boston Dynamics' Spot robot, including driving and command controls plus live video and telemetry monitoring.
- Built an AWS cloud platform for Volkswagen Financial Services: Terraform infrastructure, CI/CD pipelines and an internal frontend portal, reducing infrastructure costs.
- Mentored 6+ interns during summer internship programs.
- Wrote 2 company blog posts on emerging web and cloud technologies.

Stack: React, TypeScript, AWS, Terraform

Software Engineer — Zero Molecule

Zagreb, Croatia · Jul 2021 – Jun 2023

- Led a team of 4 building a customer service platform for gig-economy support agents, and was the main point of contact for the client.
- Shipped 6 projects from kickoff to production.
- Mentored junior developers through code reviews and pull request feedback.

Stack: React, React Query, Redux, React Router, React Admin, Formik

SKILLS

Frontend: Vue, React, Next.js, TypeScript, JavaScript, CSS, Sass, Tailwind

Data and APIs: GraphQL (Apollo), REST, Node.js, NestJS

Testing: Vitest, Playwright

Design systems: Shared component libraries, Storybook

Cloud: AWS, Terraform, CI/CD

Ways of working: Leading projects, mentoring, code reviews, working closely with design and product

EDUCATION

BSc Software Engineering — Zagreb University of Applied Sciences (TVZ)

2019 – 2023

- Winner of TVZ Mc2 2021, a student programming contest
